MARCELO PESSOA DE AGUIAR LOPES

SOFTWARE ENGINEERING · ARTIFICIAL INTELLIGENCE RESEARCH · DIGITAL GAMES

Location: Curitiba, Brazil · Phone: +55 41 98826-4641 · Email: marcelop.smile@gmail.com · LinkedIn: linkedin.com/in/marcelo-pessoa

PROFESSIONAL SUMMARY

Developer with a degree in Digital Games and a track record in applied artificial intelligence research for the public sector and in prototyping tools and applications. I facilitate groups, run collaborative projects and connect technical, creative and institutional teams, with a focus on user experience and practical delivery. I ship software under the Prism brand; Dark Room, its studio, covers games and gaming communities.

PROFESSIONAL EXPERIENCE

Office of Service and Data Governance (SGSD) · Paraná State Government

CURITIBA, BRAZIL · 2 YEARS

Artificial Intelligence Researcher · current — 6 MONTHS

Research and proofs of concept for state government modernization with **Generative AI, IDP and RPA**; feasibility assessments and compliance guidelines.

Data Management and BI — 1 YEAR

Automation assessments, dashboards and KPIs for state-level data governance.

IT Support Assistant concurrent — 6 MONTHS

Technical support for computers and systems across the office.

PREVIOUS EXPERIENCE

Technical Project Advisor — SEIA, Department of Innovation and AI — 1 YEAR · CURITIBA, BRAZIL

Vendor negotiations, compliance and feasibility assessments for AI solutions; coordination across state departments.

Communications Intern — BRDE, Regional Development Bank — 1 YEAR · CURITIBA, BRAZIL

Screening and document flow for partnerships; regulatory review and executive routing of agreements.

Motion Design and Video Intern — Celepar, Paraná State IT Company — 2 YEARS · CURITIBA, BRAZIL

Institutional animations, bumpers, video editing and visual materials about the state's digital platforms and systems.

PROJECTS

LimboOS — `React · TypeScript · Firebase`

Tabletop RPG campaign companion with an anachronistic aesthetic; delivers intel, tapes, dossiers and achievements.

Route1 Kit — `Python · desktop (pywebview) · C · C++`

PC↔DSi suite with a Python desktop app (pywebview) for DSi SD cards and flash cartridges (softmod, homebrew custom firmware, ROMs/saves, Raspberry Pi Pico flashcart (DSPico)); Route1-DSi homebrew with file management and hash-verified USB transfer.

Lumen — `Flutter · state management (Riverpod)`

ADHD, sleep and routine app (in development), with executive-function support and offline-first storage.

Prism Translate — `Swift · macOS`

Menu bar app that translates the text in the field being edited; distributed through Homebrew, the macOS package manager.

VidelBOT — `Python · Discord`

Multi-purpose Discord bot with moderation, a music queue via YouTube (yt-dlp) and Spotify (Spotipy), and server utilities; desktop GUI launcher (Tkinter).

Tic Tac Toe — `Kotlin · Android`

Native tic-tac-toe game for Android.

TECHNICAL SKILLS

LANGUAGES

C, C++, Python, TypeScript, Swift, JavaScript, Dart, SQL.

FRAMEWORKS & ENVIRONMENTS

Flutter, Node.js, cross-platform environments (Linux and macOS) for development and design/UX prototyping, Python desktop apps (pywebview), Git/GitHub, Next.js, SDL3.

LOW-LEVEL

Reverse engineering of file formats and ROMs with generative AI, binary manipulation, asset injection, USB/serial communication and firmware integration in C.

AI & DATA

Applied generative AI, Intelligent Document Processing (IDP), RPA, BI modeling, Cursor, Anti-Gravity.

NARRATIVE AND WORLD DESIGN

Narrative systems modeling and domain documentation, entity specification and systems balancing, narrative progression and mission objective design, video scriptwriting, game design and UX, group facilitation and rules-based decision-making at the table, backed by community management.

HARDWARE

Assembly and diagnostics.

COMMUNITY AND TEAM MANAGEMENT

Community management and event coordination, group leadership and coordination, facilitation and rules-based decision-making, user research and feedback for product/UX and game design.

AUDIOVISUAL PRODUCTION

Production and editing, basic audio operation and mixing, creative writing, design in service of the experience in games and interfaces.

EDUCATION & CREDENTIALS

Technologist Degree in Digital Games

Universidade Positivo · June 2026

Official Digital Diploma — Brazilian Ministry of Education (MEC), ICP-Brasil signed (MEC Ordinance 180 / e-MEC 1551147).

`1042.1042.010566a2898a`

CERTIFICATION

Google AI Essentials — Coursera (2025)
Platforms · Google Workspace AI (Studios) · Google Flow · Google Stitch · Gemini.

LANGUAGES

Portuguese · Native · **English** · CEFR A2 (fluent technical reading)

OTHER PROJECTS

Pokémon SoulSilver (IPGE by 01)
Fork of Pokémon SoulSilver ported natively to PC, with a C++/SDL3 engine.

Pokéwalker Companion
iOS app that recreates the Pokéwalker and syncs data with HeartGold/SoulSilver cartridges through a Raspberry Pi Pico flashcart (DSPico).

358/2 Days PT-BR
Brazilian Portuguese localization with custom tools for extracting and injecting strings into a Nintendo DS ROM.

Shike Minoda
Software prototype of a real-time guitar effects chain, with pedal modeling and DSP processing.
